Product Description

- Advanced automatic electronic ignition device energy-saving, high efficiency;
- High precise microcomputer digital display controller,control temperature automatically;
- Using far-infrared electric heaters makes fire heating to be uniform;
- With a timing alarm device, it wil turn off when overheat happens;
- The upper and bottom heater can be controlled separately;
- Toughened glass windows can review the baking condition, universal wheels to move easily;
- Each layer can be used separately, several layers also can be used at the same time;

TUNNEL OVEN

Continuous baking,large baking capacity,easy operation and labour saving.

Wide baking range.separate control with upper,lower fire,applicable for baking different kinds of food, e.g.moon cake , bread,cake ,hamburger,toast,biscuit,etc.

Good baking effect,heating wire imported from Japan.Colour with clear separation from beginning to end.

Safe.Electric current with electronic organs imported from Japan.Durable and safe.

Adopts importing heat preservation materials with enough thickness of good effect if heat preservation

Beautiful and natural appearance with importing stainless steel material.

Width and length of the product as per the request of customers.

Electric Combi-Oven

Product Description

- Efficient heating controller, heating fast
- All stainless steel body,oven chamber stretched by round corner,easy to cleaning
- With 50 commonly menus in manual type oven for long-term use
- With 100 menus in digital controlled type,multifunction
- With 360 degrees hot air heating,steam function,make temperature more uniform
- The steam boiler spray function ensures sufficient steam
- Temperature sensor inside the food ensure the food to be cooked
- Hot and cold air exchange ,exhaust function,keep food fresh when baking and roasting
- Automatic three-level cleaning function,save time and energy

Dough Mixer Double Motor Double Speed

Features

- Both mixer and bowl revolve simultaneously during working, thus the mixing speed is greatly increased, and the mixing effect is greatly improved.
- New Improved Belt and Chain Drive Top quality belt and gear driven motor with lower noise ,
- Metal-rubber composite gear type belt non-slipping ,
- High power, yet quiet and reliable motor.
- Stir and bowl work together,
- Double motion function,

Dough Mixer With Computer Panel

Features

- Reason is there are two pure copper motors inside, one in the upper body and one in the middle body. They work independently for the dough hook and bowl, one dough working need 10 minutes, even work long time one day, it with long life-span in all bread factories.
- Strong, durable and high-efficiency is the most outstanding features for our heavy duty dough mixers.
- SS304 for bowl, dough hook etc. Bowl more thickness.
- High-end motor in China for many years.
- Powerful belt construction with low noise.

Continuous Dough Divider And Rounder Machine

Features

- The body is made of high-quality wear-resistant steel, and the outer surface and guide rail are sprayed with wear-resistant Teflon, which will not stick to the dough. Conical spiral guideways are made of aluminum alloy. Precise assembly, ensure the perfect contact Angle between guide rail and cone, to ensure the roundness of dough.
- The equipment can be used independently and combined with the block dividing machine, the middle wakening machine, or the shaping machine into a production line.

Automatic Quantitative Injection Filling Machine

Features

- Automatic quantitative injection machine is a manual/semi-auto quantitative, filling semi-fluid raw material advanced equipment for materials.
- Can be used for filling of bread, cakes, puffs, cupcakes, donuts, etc.
- The single-digit display setting system makes quantitative work easier, faster and more accurate.
- Through the mode switch button, it is convenient to switch between quantitative injection mode and continuous injection mode.
- Three control methods include: pedal (hand grip) control, photoelectric induction control.
- The external signal control makes the operability of the device more perfect. Change different discharge heads, you can to apply to a wider range of product production.

Burger Patty Machine

General Feature

- Anodized aluminum base and stainless steel bowls offer a durable, heavy-duty construction,designed for high-volume use.
- This patty press is controlled with a simple, single-level press handle for easy operation.
- Its compact, ergonomic design makes this ideal for storage and saving essential counter space.
- Non-skid feet ensure that your press stays in place throughout all day use.
- Aids in portion control to increase yield and decrease waste *Stain - less steel bowls and press plate.
- Heavy-duty, single-level press handle.
- Detachable paper holder.
- Compact ergonomic design.

Meat Beating Machine

- More thoroughgoing meat slurry processed, significantly improved meat fat fiber. So the meat/fish balls are more elastic and subtle.
- Freezing water can be injected to cool down the Meat slurry to keep the meat quality.
- Cutting knife are specially treated with longer life spans but are sanitary ensured.
- High-speed spinning type: Meatbeating finished within only 3 Minutes.
- Widely applied for boneless Fish meat, chicken meat and beef.
- Stainless steel food stuff cartridges.
- Inner and outer cartridge design.
- Easy to clean.

Hand-Pressed Plastic Shell Sealer/Hand-Pressed Iron Shell Sealer

General Feature

- The quality is stable.
- Patent transformer.
- Patented high-precision controller
- Patent high precision controller.
- Patent transformer.
- Iron shell, more durable.
- Strengthen the stability ofthe electrified components to ensure the normal electrification of the circuit.

Table Top Cup Washing Machine

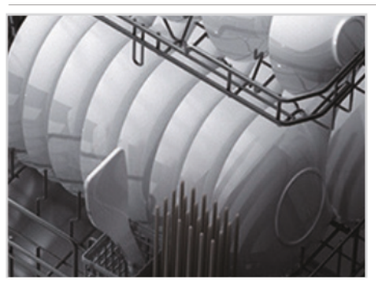

Product Description

- Mechanical control panel, easy to use, reduces user requirements;
- Patent design spray arm. The upper and lower washing arms spray without dead corners;
- Imported hexagonal heating tube, made of stainless steel material, with high thermal efficiency and durability;
- The independent high-temperature water tank can reach a high temperature of 82-92 ℃, and disinfection is more thorough;

• Model:	AS-DW1
• Voltage:	220V/380V
• Power:	7.5/12.0 kW
• Cleaning Efficiency:	40-60 Baskets/H
• Water Consumption:	1.2L/Basket
• Running Temp.:	82-92 ℃
• Dimensions:	600*680*850mm
